

# In Brief

## Your practice needs a centralized resource for disease state management **Your practice deserves e-Therapeutics+**

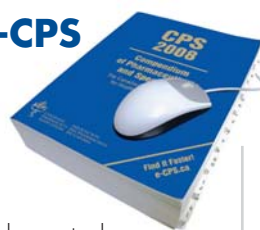

The next generation of professional tools is waiting for you. e-Therapeutics+ is your centralized resource for the most current, evidence-based Canadian drug and therapeutic information available on the Web. Combining CPhA's *Therapeutic Choices*, the full power of e-CPS and a continually growing range of external resources, e-Therapeutics+ helps you know what works when.

**Its frequently updated, disease-oriented approach makes e-Therapeutics+ a natural fit for your practice, giving you online access to:**

- Evidence-based treatment options for common medical conditions, written and peer-reviewed by distinguished Canadian health care professionals
- Relative drug costs, calculated for therapeutic condition and length of treatment, help prescribers weigh the economic implications of drug choices for their patients
- Drug tables formatted for quick reference of dose, adverse effects, drug interactions and relative cost
- A drug interaction analyzer to provide comprehensive interaction information

**Plus, e-Therapeutics+ has the full power of e-CPS built right in!**

- Thousands of Health Canada-approved drug monographs, complemented by 129 CPhA monographs, fully searchable and linked directly to Health Canada advisories and warnings
- Printable Information for the Patient handouts, written in plain language, to advise your patients on safe, effective use of their medications
- Full-colour product images, accessed through drug monographs and searchable by appearance
- Printable drug monographs that allow you to select and print only the information you need

**“e-Therapeutics+ is an essential resource that has added significant value to the services we provide to our patients. I can't imagine working without it.”**

*Tom Dolanjski, Pharmacist  
East End Family Health Team*

# What subscribers think ...

Librarian Nancy McAllister uses e-Therapeutics+ within the Miramichi Regional Health Authority in Miramichi, New Brunswick. Here's what she thinks:

## Centralized reference

"We now have instant access to the information our practitioners are seeking on a regular basis. Features such as the patient information sheets and the drug interaction tool can be placed immediately at the fingertips of our front-line providers."

## Health Canada advisories

"The advisories are incredibly important for drug safety and it's great to have them alongside any medication where they apply."

## Advanced search

"It makes it easy to catch and assess any potential risks from the start. If someone has an allergy to eggs, you can search egg or albumin and it'll show you what medications to avoid."

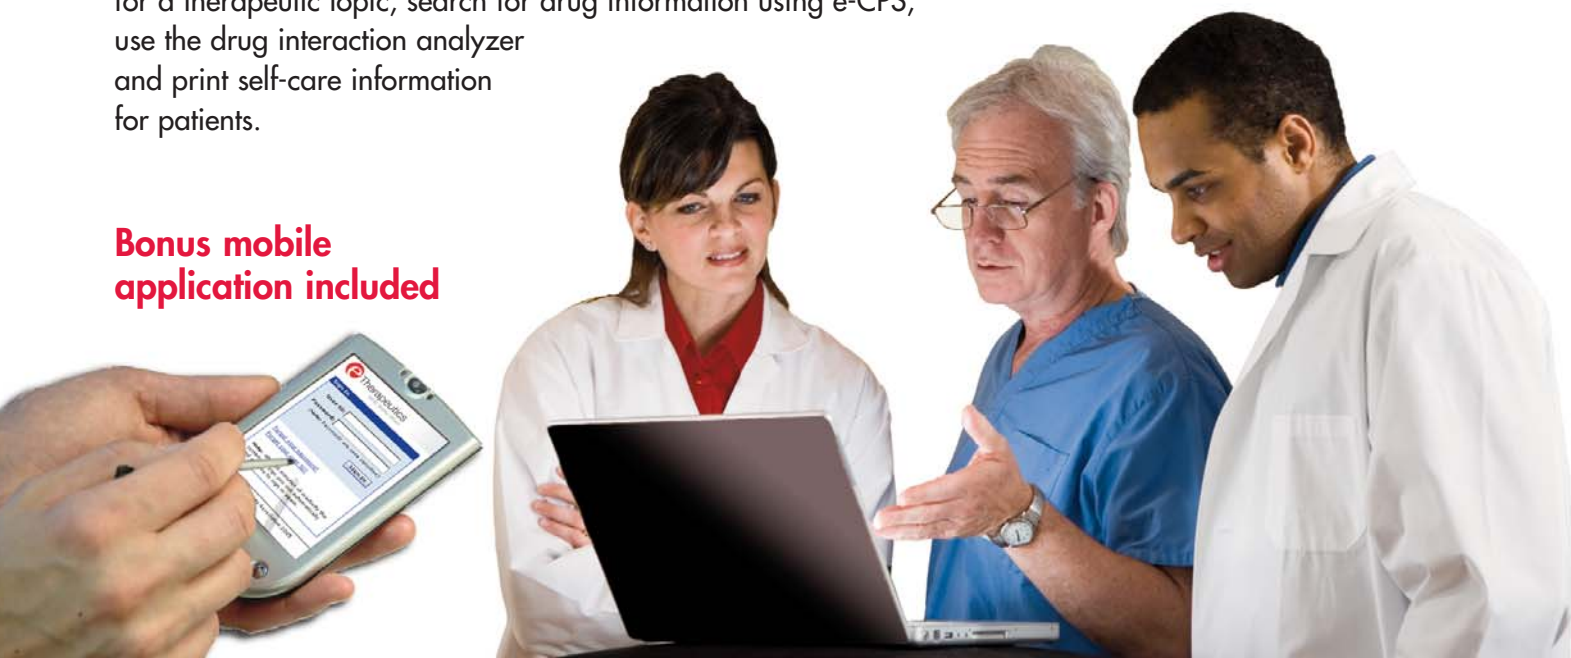

# Don't take our word for it, try it yourself . . .

Visit us online at [www.pharmacists.ca/et](http://www.pharmacists.ca/et)

You'll find a full **product tour** to give you more information on the look and functionality of e-Therapeutics+.

There are also four **product simulations** that give you detailed information on how to search for a therapeutic topic, search for drug information using e-CPS, use the drug interaction analyzer and print self-care information for patients.

## Bonus mobile application included
