MEDICATION REVIEW SERVICES

Providing Effective Medication Review Services in Your Community Pharmacy

Description

Across Canada, a growing number of provincial governments are recognizing the expanding role of pharmacists within the health care system by reimbursing pharmacists for providing various medication review services. Medication Review Services is an online continuing education certificate program that provides community pharmacists with basic knowledge and processes, as well as practical exercises, to begin delivering high-quality medication review services to their patients.

Topics covered include medication assessment, approaches to identifying drug therapy problems (DTPs), care plans, documentation and follow-up. The program also provides a summary of, and online access to, information and available resources from the existing provincial medication review service reimbursement programs.

Modules include:

MODULE 1: Assessing, Identifying DTPs and Developing Care Plans

5.0 CEUs, File # 8002-2013-135-I-P

- Describe the three main components of medication review: medication assessment, care plan and follow-up evaluation.
- Identify essential information to elicit for a medication assessment.
- Reflect on a systematic approach for identifying DTPs.
- Identify and describe the components of a care plan and a follow-up evaluation.
- Develop a written care plan for patient scenarios including solution-focused suggestions, monitoring/follow-up plans.
- Use criteria to self-assess the completeness and effectiveness of a care plan.
- Identify steps for further learning and available resources to complete medication reviews efficiently and effectively, and develop an action plan to address further learning.

MODULE 2: Implementing Care Plans and Documentation

3.0 CEUs, File # 8002-2013-136-I-P

- Reflect on how a care plan can be implemented in the community pharmacy practice setting.
- Reflect on elements of successful communication and collaboration with other health care professionals as it pertains to medication review/assessment.
- List essential components of a documentation note in a medication review/assessment.
- Complete a written documentation note for a patient scenario.
- Utilize criteria to self-assess the effectiveness of a documentation note.
- Identify steps for further learning and available resources to complete medication reviews efficiently and effectively, and develop an action plan to address further learning.

Providing Effective Medication Review Services in Your Community Pharmacy

Accreditation and Completion Requirements

Each module has been accredited as a continuing education certificate program by the Canadian Pharmacists Association (CPhA), a CCCEP-approved accredited provider. To earn the continuing education certificate for each module, participants must complete all module requirements including all quizzes, written assignments, self-assessments and self-reflective activities. Complete details on these items are provided within the program.

Participants who achieve the certificates of completion may state that they hold a:

- Continuing Education Certificate in Providing High Quality Medication Review Services: Module 1 (Assessing, Identifying DTPs and Developing Care Plans), and
- Continuing Education Certificate in Providing High Quality Medication Review Services: Module 2 (Implementing Care Plans and Documentation).

The program certificates do not provide participants with professional certification credentials.

Availability

This self-directed online course is available for registration up until its accreditation expiry date of June 29, 2015. Annual accreditation renewal is expected. We recommend you complete the course within 90 days of registration.

Pricing
